Introduction

Hello! Thank you for purchasing from Template Rex!

Hope you enjoy your HYIP Manager MixPanel script, enjoy all its included features, get paid automatically via Coinbase, Coinpayments, Paykassa, PerfectMoney and Payeer! use the license included in your order to install it on your hosting / domain you want to start a project. you can contact me at **hey@templaterex.com**! I promise I won't bite.

Remember that on our website you will find ready to use templates customized with your Script with attractive designs that will attract more customers to your project.

How it works

HYIP Manager MixPanel supports PerfectMoney, Payeer, EpayCore, Bitcoin, Ethereum, Litecoin, BNB, Solana, Cardano, Monero, USDCoin, BUSD, Tether, Velas, ChainLink, XPR, TRON, NEO, Bitcoin Cash, Dai, Dash, Dogecoin, Stellar, Zcash.

HYIP Manager MixPanel is a package for investment sites. This software helps you to create and manage your own HYIP with ease. Receive automatic deposits and automatic withdrawals in your project, bulk payment and instant payment included. The combination of price, features, performance and security is the best on the market today.

Installation in CPanel

(If you have a different administrator or VPS use the following steps as a global guide)

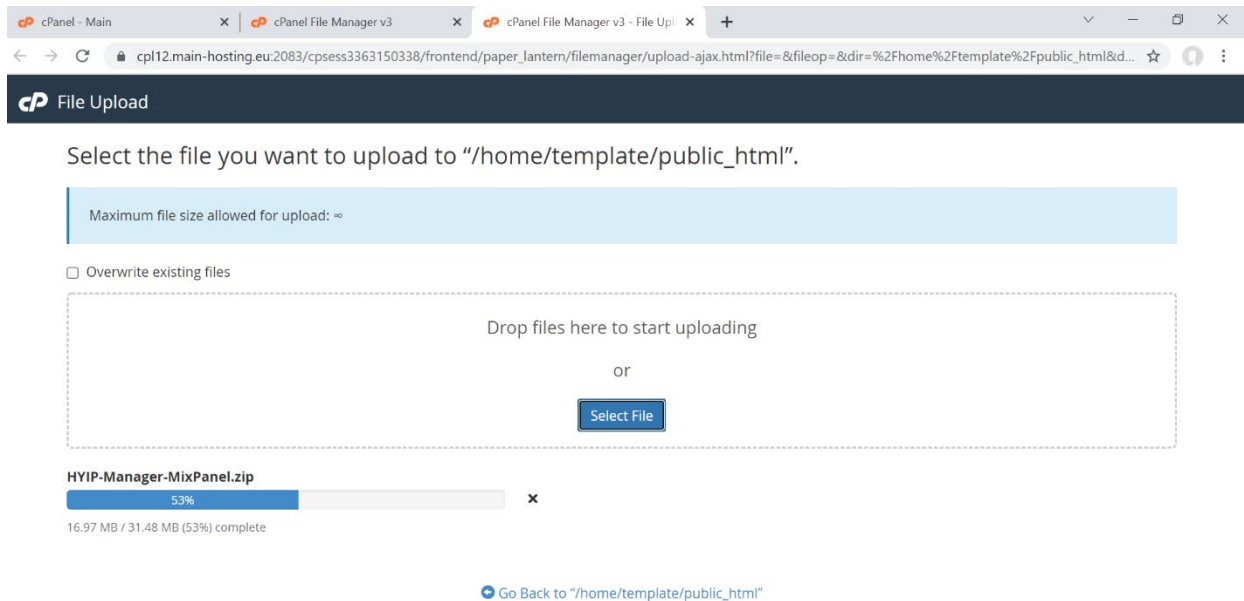

Installing the HYIP Manager MixPanel script will be a simple process check the following steps below.

1. Check that the script is in .ZIP before beginning the upload.

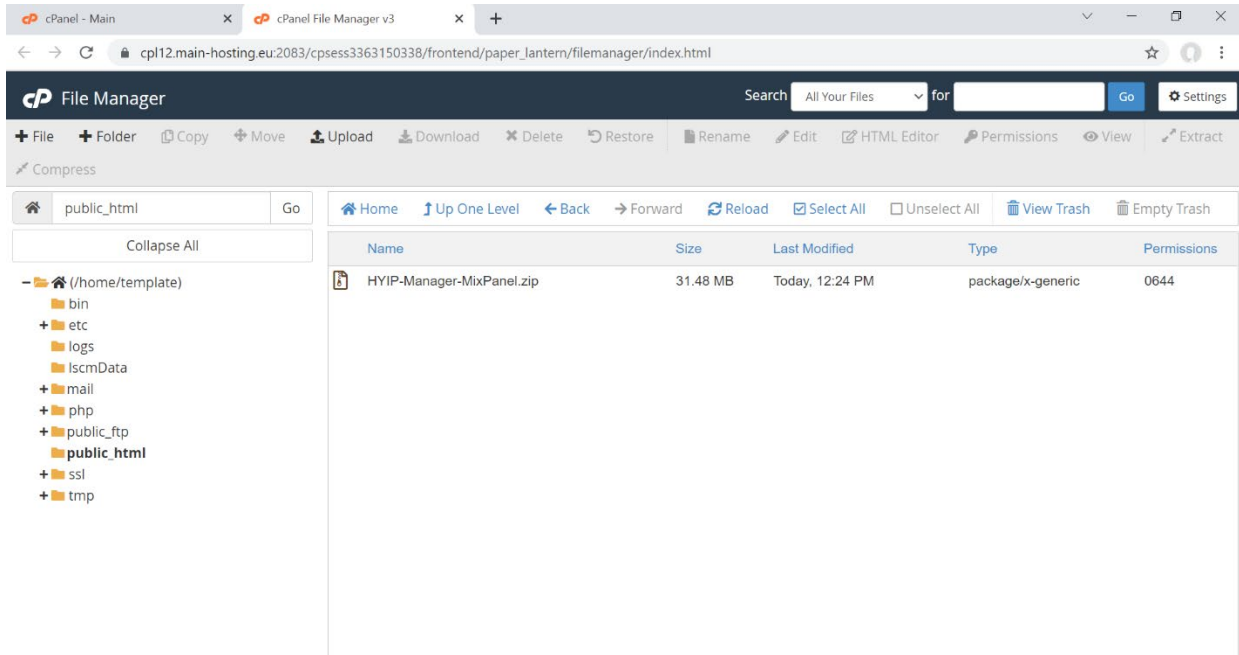

HYIP-Manager-MixPanel.zip

2. Upload HYIP-Manager-MixPanel the .ZIP using an FTP or file manager to the directory where the Gold Coders Manager Script is installed.

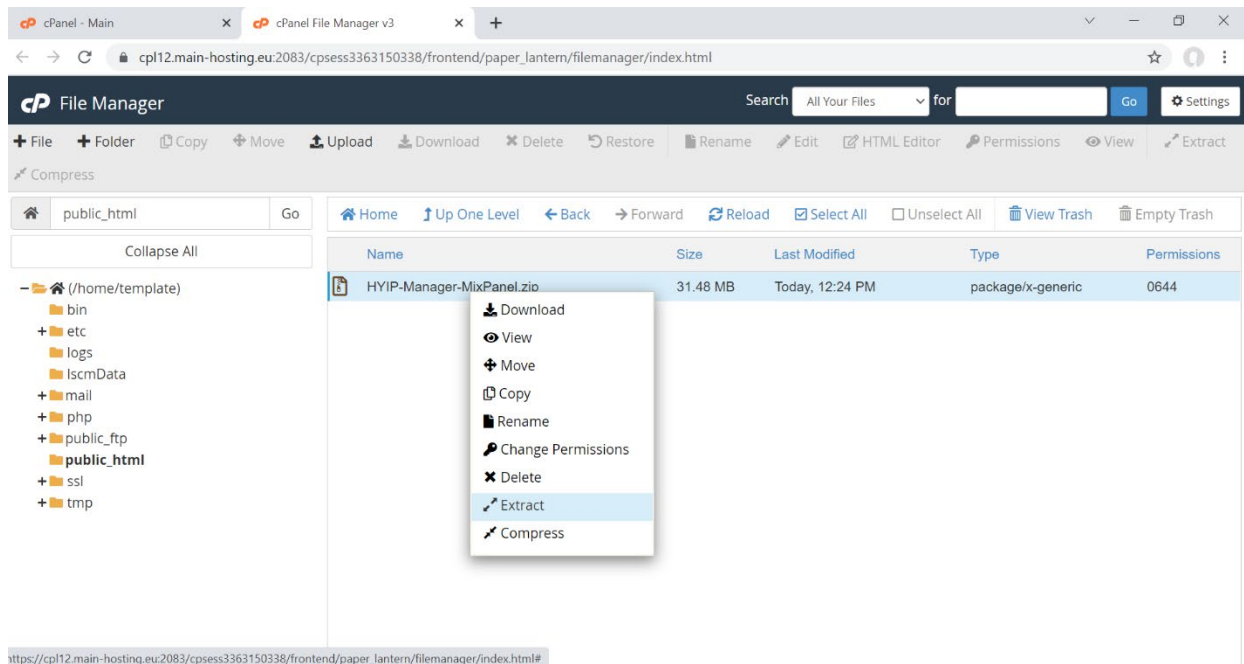

The screenshot shows the cPanel File Upload interface. At the top, there are three browser tabs: 'cPanel - Main', 'cPanel File Manager v3', and 'cPanel File Manager v3 - File Upload'. The address bar shows the URL: 'cpl12.main-hosting.eu:2083/cpsess3363150338/frontend/paper_lantern/filemanager/upload-ajax.html?file=&fileop=&dir=%2Fhome%2Ftemplate%2Fpublic_html&d...'. The main heading is 'File Upload'. Below this, it says 'Select the file you want to upload to "/home/template/public_html"'. There is a light blue box with the text 'Maximum file size allowed for upload: ∞'. Below that is a checkbox labeled 'Overwrite existing files'. A large dashed box contains the text 'Drop files here to start uploading' and 'or' above a 'Select File' button. At the bottom, there is a progress bar for 'HYIP-Manager-MixPanel.zip' showing 53% completion. Below the progress bar, it says '16.97 MB / 31.48 MB (53%) complete'. At the very bottom, there is a link that says 'Go Back to "/home/template/public_html"'. There are also three gold coins with the Litecoin symbol (L) on them, one on the right side and two at the bottom corners.

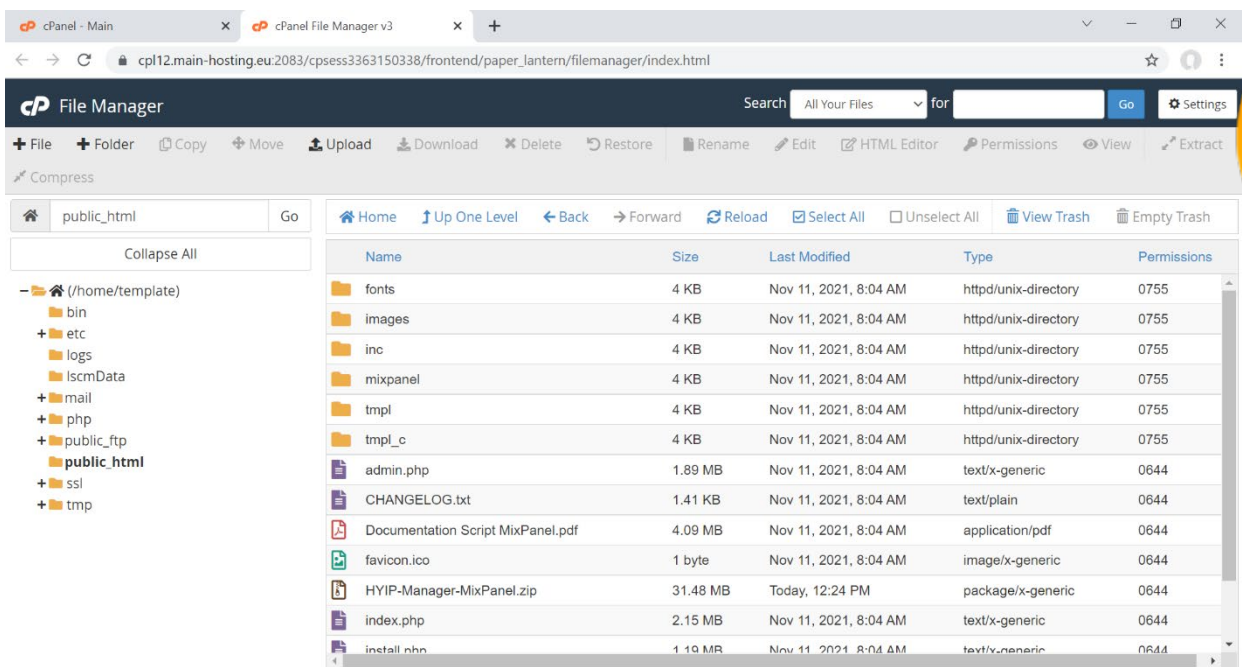

3. It will have been uploaded to the root directory of the website as shown below.

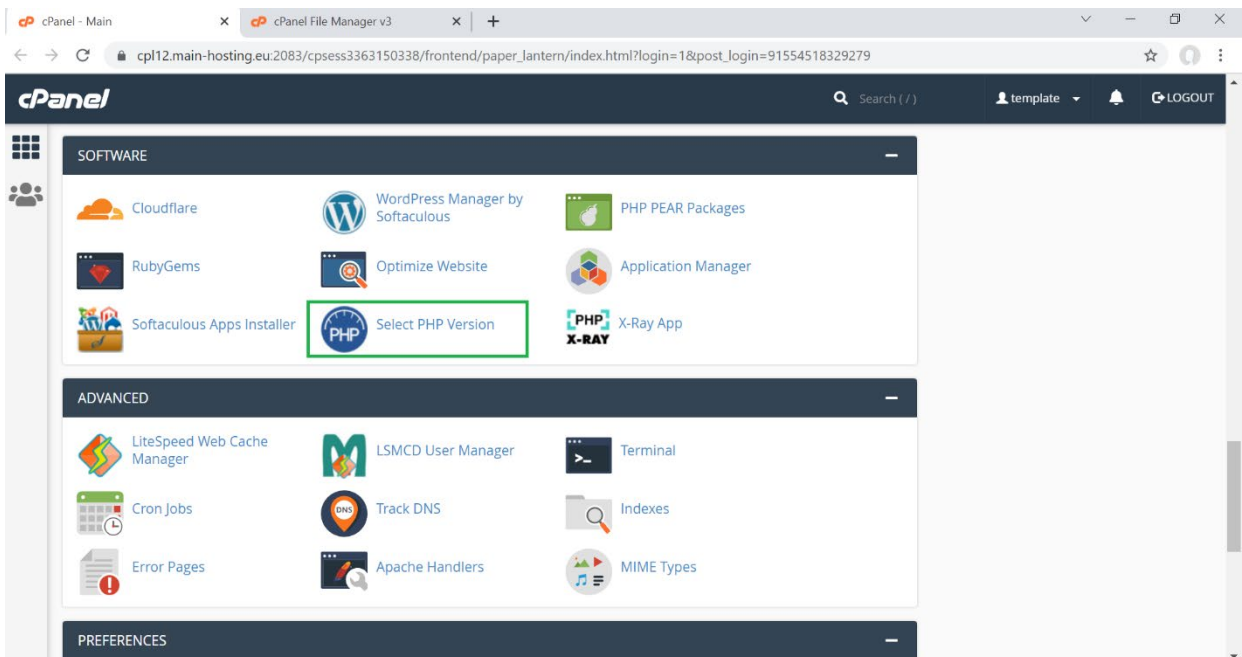

4. Proceed to unzip your script in the root directory, this process will write some files to work the script correctly.

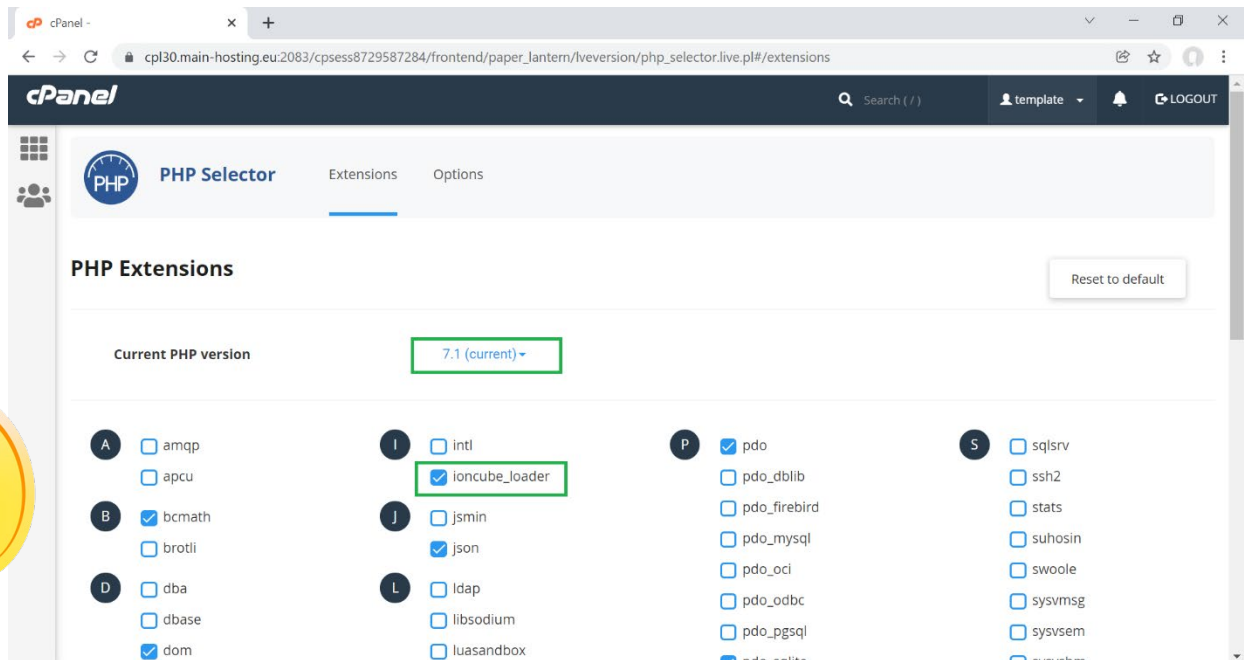

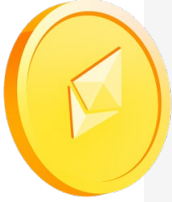

5. To see the files of your script in the root of your domain in the following way.

6. Then go to the CPanel of your hosting and configure the PHP version of your domain in version 7.x

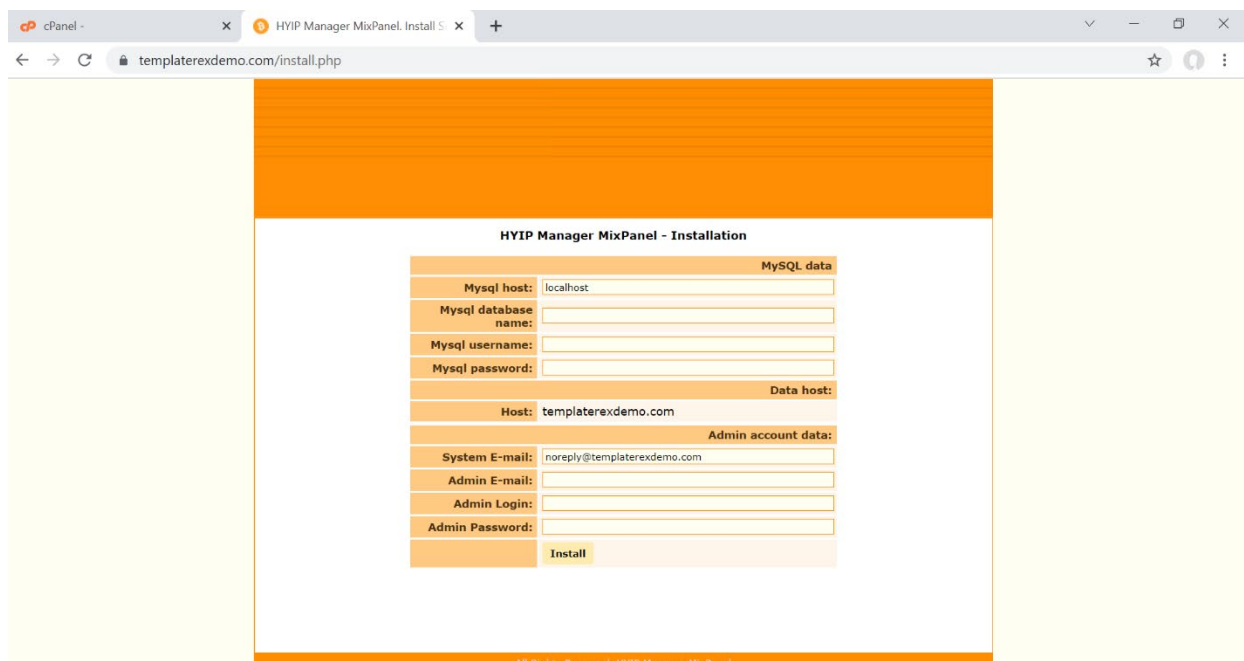

Check your version PHP and change to only PHP 7.1 to PHP 7.4:

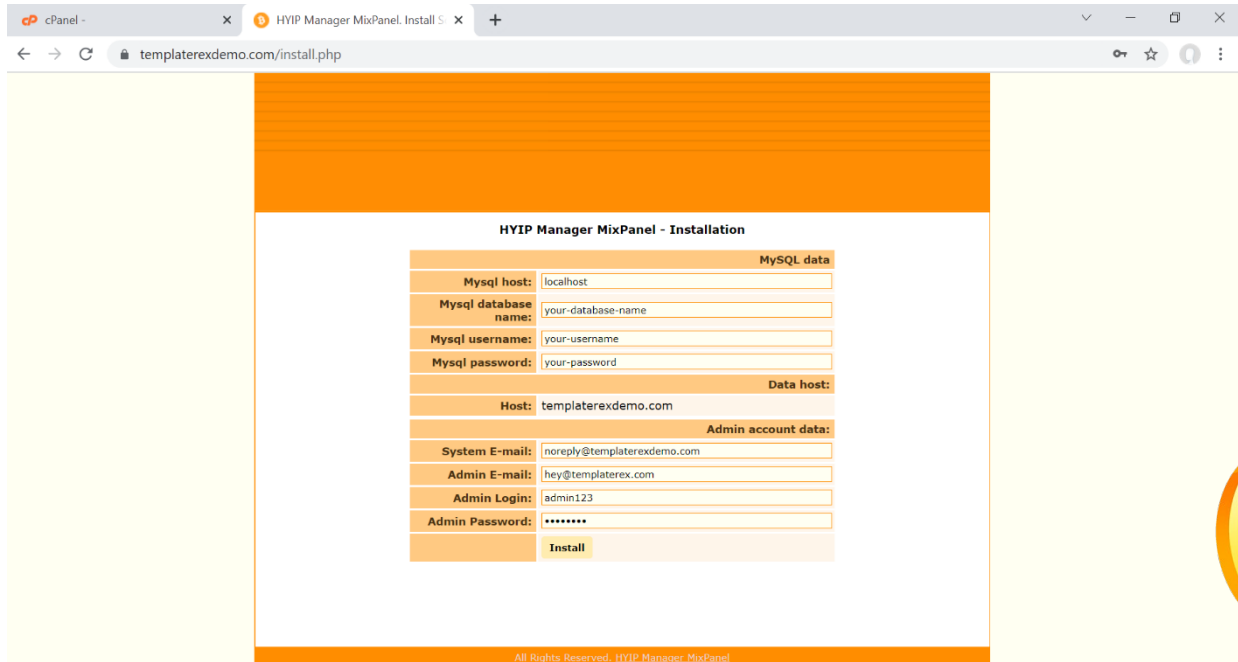

The screenshot shows the cPanel PHP Selector interface. The 'Current PHP version' is set to '7.1 (current)'. Under the 'Extensions' tab, the 'ioncube_loader' extension is checked and highlighted with a green box. Other extensions like amqp, apcu, bcmath, brotli, dba, dbase, dom, intl, jsmn, json, ldap, libsodium, luasandbox, pdo, pdo_dblib, pdo_firebird, pdo_mysql, pdo_oci, pdo_odbc, pdo_pgsql, pdo_sqlite, sqsdrv, ssh2, stats, suhosin, swoole, sysvmsg, sysvsem, and xcache are listed with checkboxes.

7. Go to your domain and enter the address by adding /install.php to start the process of installing your script Example : your-domain.com/install.php

The screenshot shows the HYIP Manager MixPanel installation page. The page title is 'HYIP Manager MixPanel - Installation'. It contains a form with fields for MySQL data (host, database name, username, password), Data host (host), and Admin account data (System E-mail, Admin E-mail, Admin Login, Admin Password). An 'Install' button is at the bottom of the form.

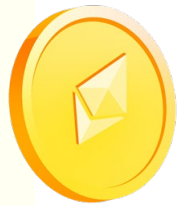

8. The script will request the information of your database (name of database, user database and password of your database) enter them and finally your email of administrator and administrator password that will be linked to your script.

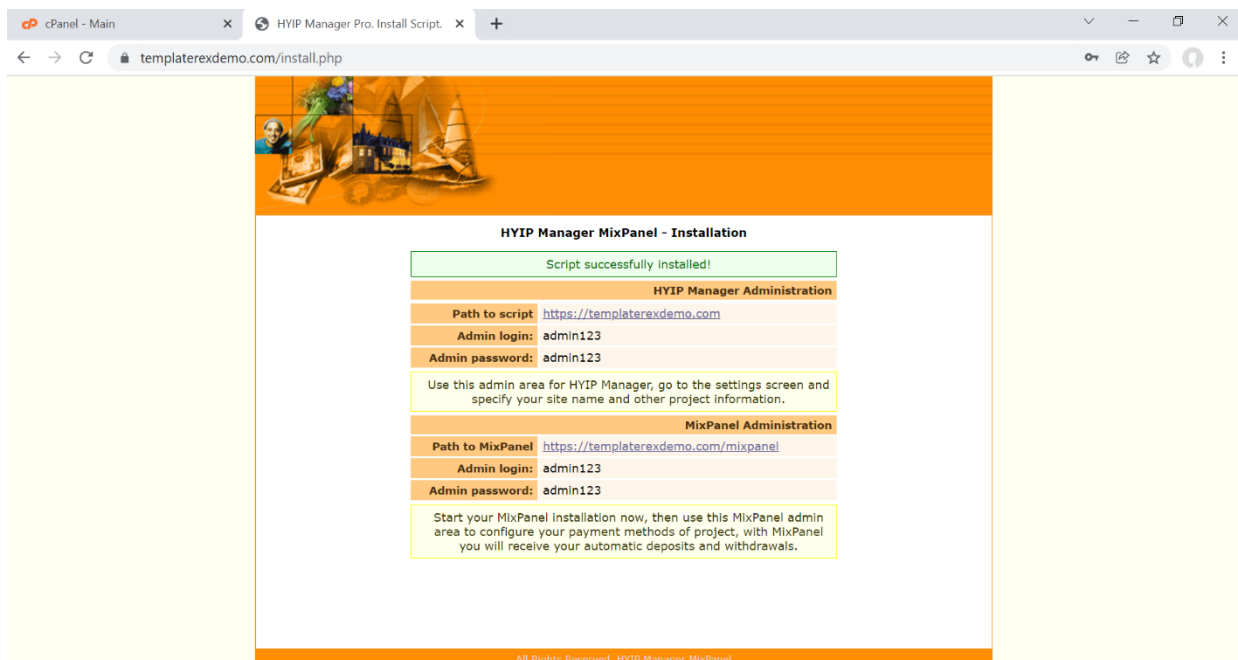

The screenshot shows a web browser window with the URL `templatere demo.com/install.php`. The page title is "HYIP Manager MixPanel - Installation". The form is divided into several sections:

- MySQL data:**
 - Mysql host: localhost
 - Mysql database name: your-database-name
 - Mysql username: your-username
 - Mysql password: your-password
- Data host:**
 - Host: templatere demo.com
- Admin account data:**
 - System E-mail: noreply@templatere demo.com
 - Admin E-mail: hey@templatere demo.com
 - Admin Login: admin123
 - Admin Password: *****
- Install:** A button to submit the form.

At the bottom of the page, it says "All Rights Reserved. HYIP Manager MixPanel".

9. This completes the process of installing your script correctly, you can see a confirmation screen where you have finished installing the script, remember to save the access credentials of your administrator user.

The screenshot shows the same web browser window, but now the page displays a confirmation message: "Script successfully installed!". Below this, there are two sections of information:

- HYIP Manager Administration:**
 - Path to script: <https://templatere demo.com>
 - Admin login: admin123
 - Admin password: admin123
- MixPanel Administration:**
 - Path to MixPanel: <https://templatere demo.com/mixpanel>
 - Admin login: admin123
 - Admin password: admin123

There are also two paragraphs of instructions: "Use this admin area for HYIP Manager, go to the settings screen and specify your site name and other project information." and "Start your MixPanel installation now, then use this MixPanel admin area to configure your payment methods of project, with MixPanel you will receive your automatic deposits and withdrawals." At the bottom, it says "All Rights Reserved. HYIP Manager MixPanel".

10. Now click Path to script link first, it will open a new tab with your website, you need to visit your website URL first before proceeding with successful installation of MixPanel.

HYIP Manager MixPanel - Installation

Script successfully installed!

HYIP Manager Administration

Path to script: <https://templatere demo.com>

Admin login: admin123

Admin password: admin123

Use this admin area for HYIP Manager, go to the settings screen and specify your site name and other project information.

MixPanel Administration

Path to MixPanel: <https://templatere demo.com/mixpanel>

Admin login: admin123

Admin password: admin123

Start your MixPanel installation now, then use this MixPanel admin area to configure your payment methods of project, with MixPanel you will receive your automatic deposits and withdrawals.

All Rights Reserved. HYIP Manager MixPanel

11. After doing the above step, go back to your installer tab and proceed to install your MixPanel to use your payment processors.

HYIP Manager MixPanel - Installation

Script successfully installed!

HYIP Manager Administration

Path to script: <https://templatere demo.com>

Admin login: admin123

Admin password: admin123

Use this admin area for HYIP Manager, go to the settings screen and specify your site name and other project information.

MixPanel Administration

Path to MixPanel: <https://templatere demo.com/mixpanel>

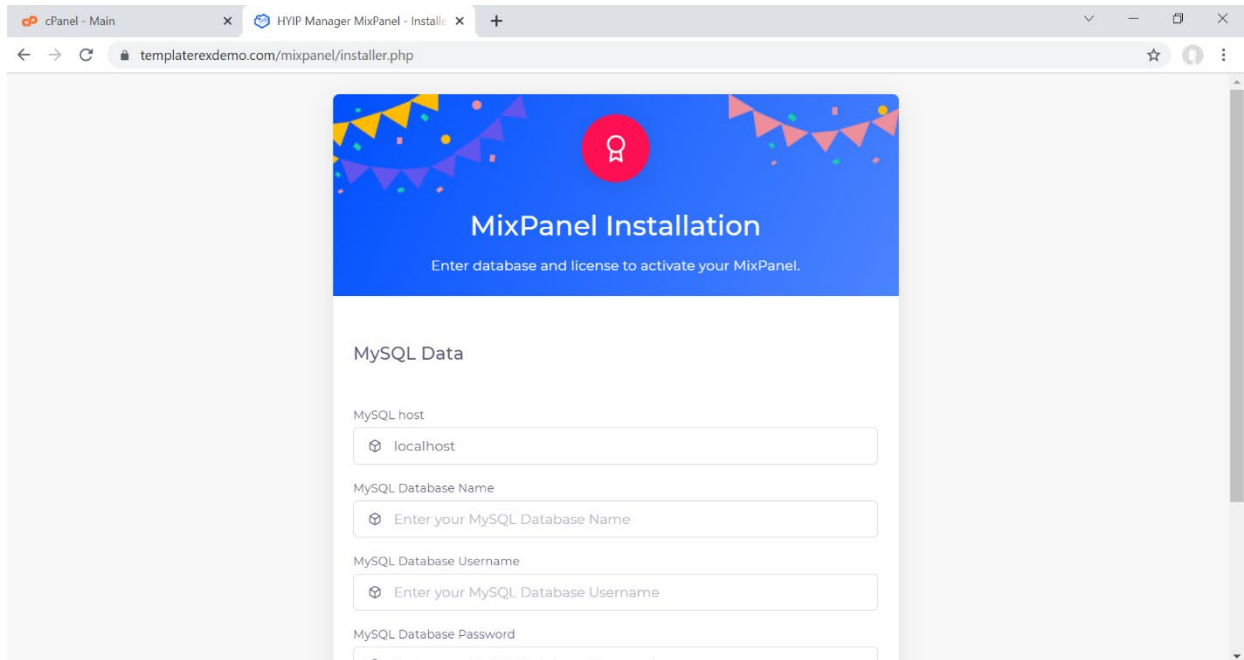

Admin login: admin123

Admin password: admin123

Start your MixPanel installation now, then use this MixPanel admin area to configure your payment methods of project, with MixPanel you will receive your automatic deposits and withdrawals.

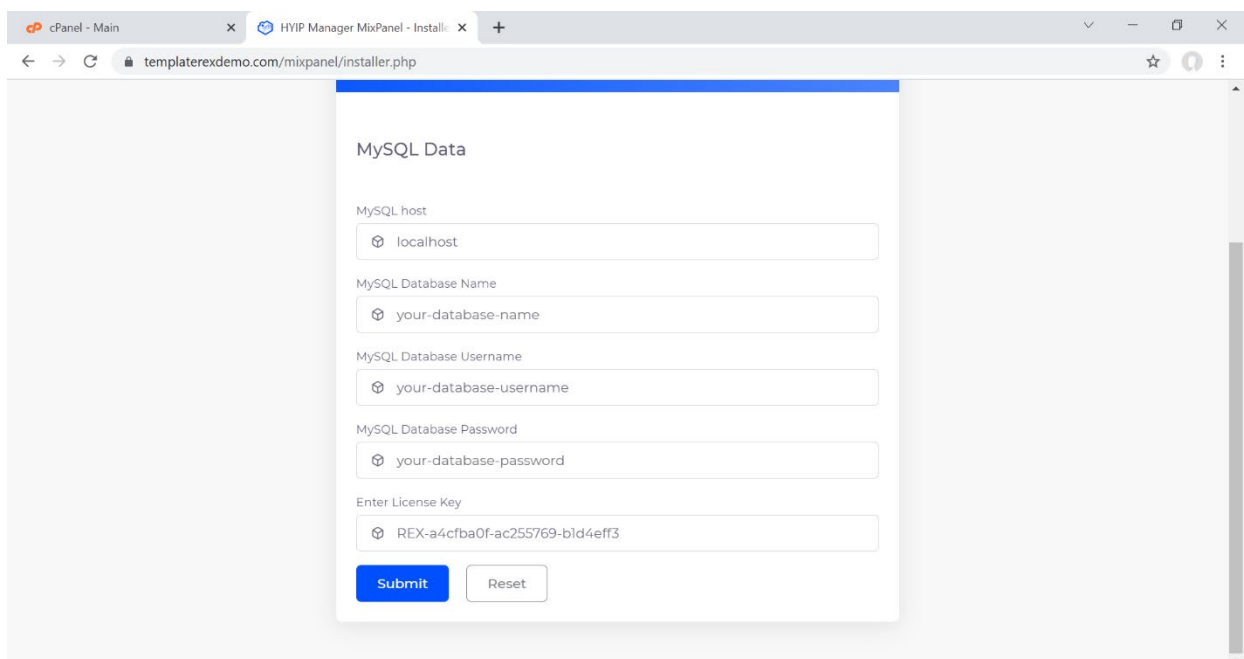

All Rights Reserved. HYIP Manager MixPanel

12. You should now be on the MixPanel activation and installation screen, **enter exactly the same data from your database used previously** (name of database, user database and password of your database) and your MixPanel license

The screenshot shows a web browser window with the URL `templatere demo.com/mixpanel/installer.php`. The page title is "MixPanel Installation" and it includes the instruction "Enter database and license to activate your MixPanel." The "MySQL Data" section contains four input fields: "MySQL host" (pre-filled with "localhost"), "MySQL Database Name" (placeholder "Enter your MySQL Database Name"), "MySQL Database Username" (placeholder "Enter your MySQL Database Username"), and "MySQL Database Password" (placeholder "Enter your MySQL Database Password").

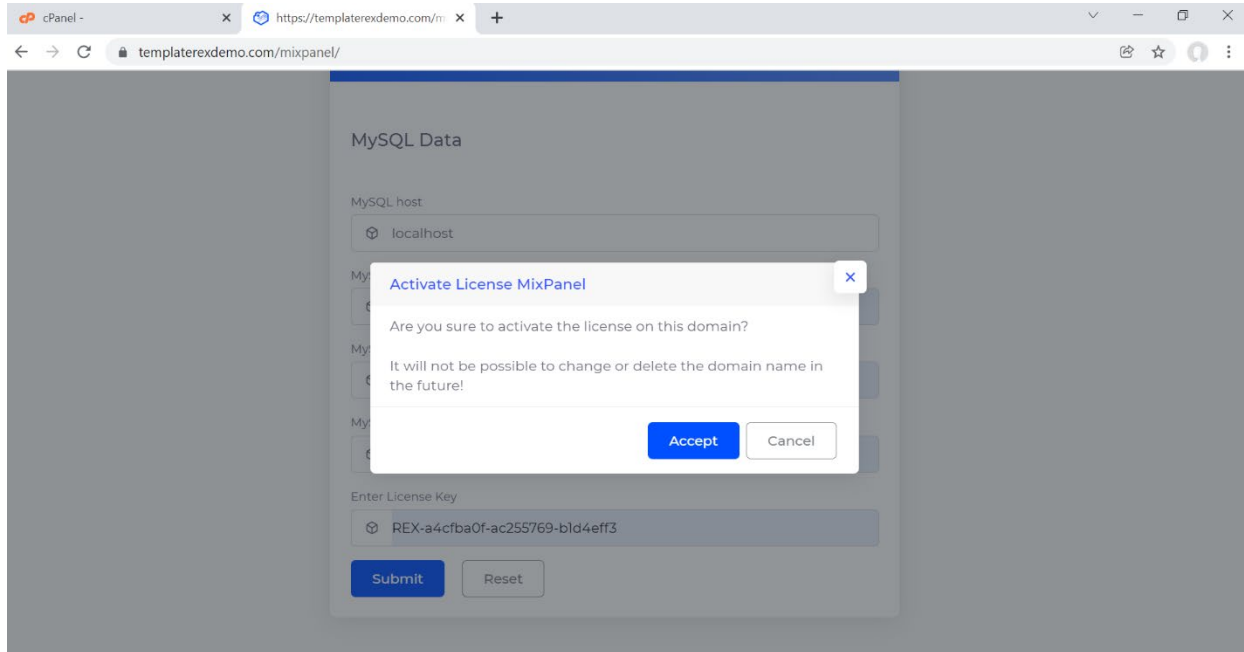

13. Enter exactly the same data from your database used previously (name of database, user database and password of your database) and your MixPanel license.

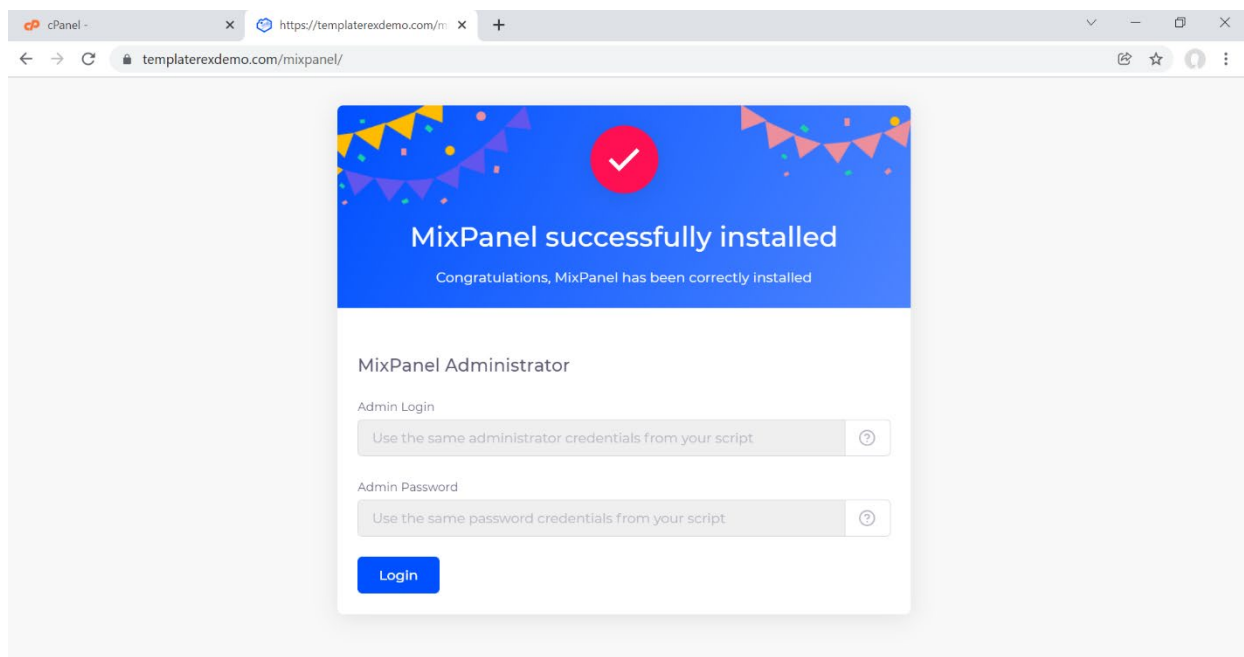

The screenshot shows the same "MixPanel Installation" page, but now the input fields are filled with example data. The "MySQL Database Name" field contains "your-database-name", the "MySQL Database Username" field contains "your-database-username", and the "MySQL Database Password" field contains "your-database-password". A new "Enter License Key" field has been added at the bottom, containing the license key "REX-a4cfba0f-ac255769-b1d4eff3". Below the license key field are two buttons: "Submit" and "Reset".

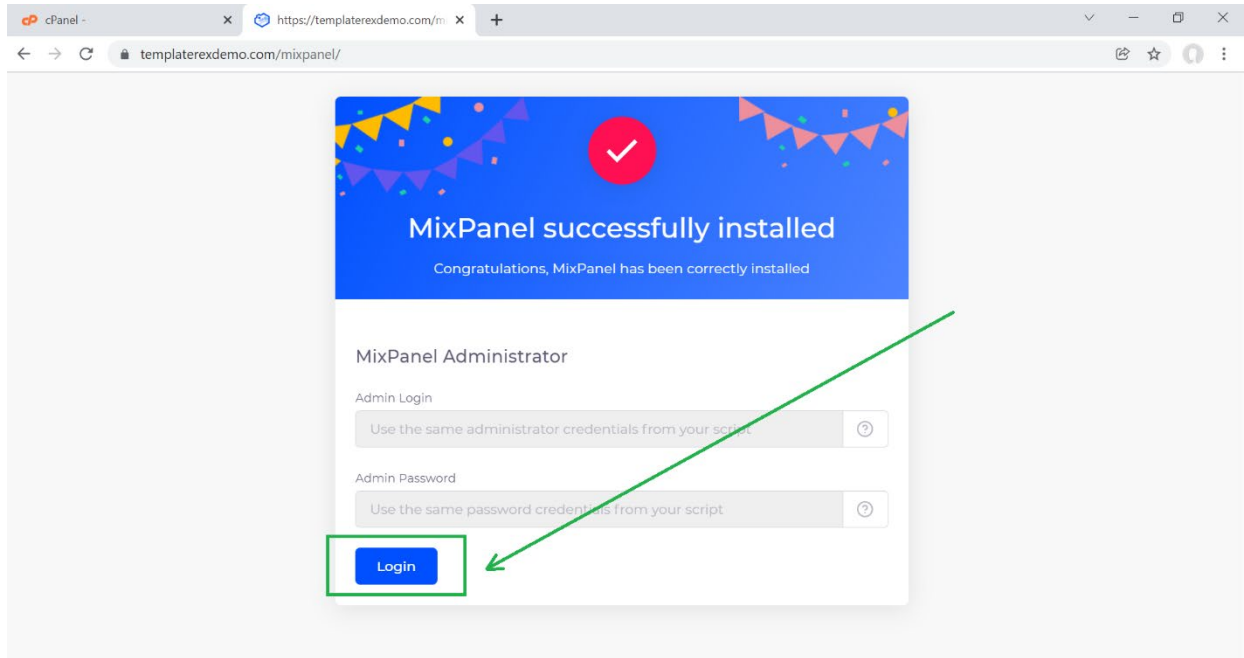

14. When you complete all the data requested in the installation of MixPanel and click submit, a window will appear asking you to confirm the activation of the license in your domain, **once confirmed your license will be activated in the domain, remember that you cannot change or delete your license that domain so activate your license wisely.**

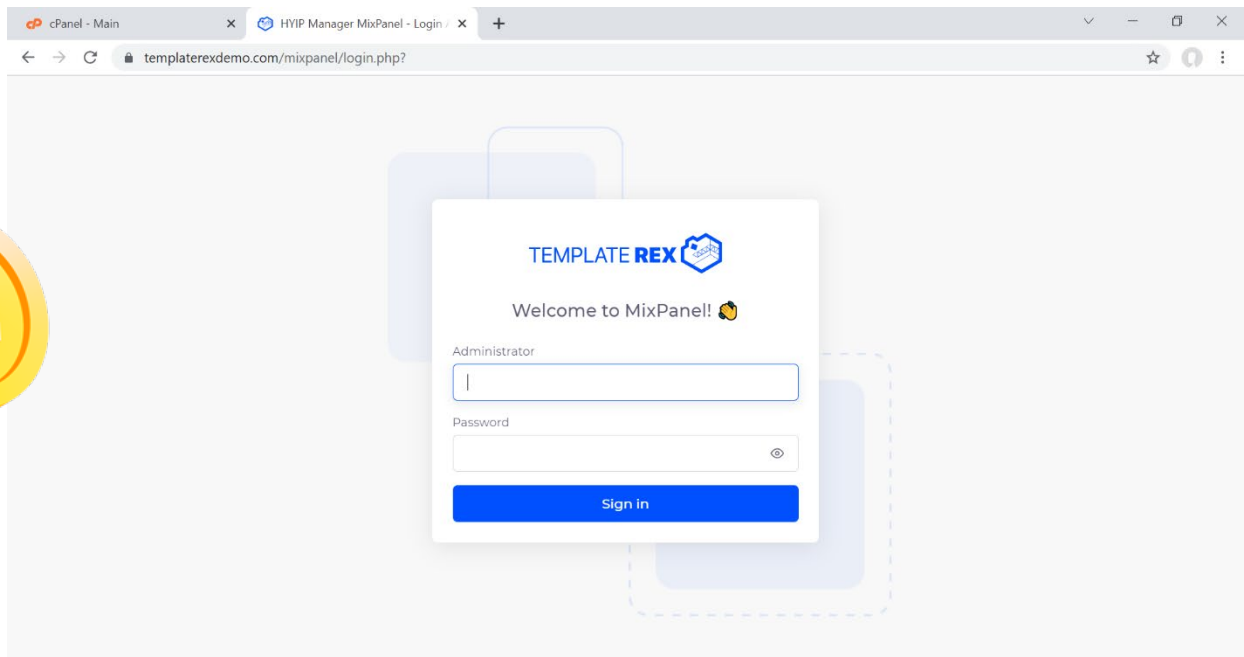

15. If you enter your database information correctly and your MixPanel license is valid, you will see the screen to confirm the complete installation.

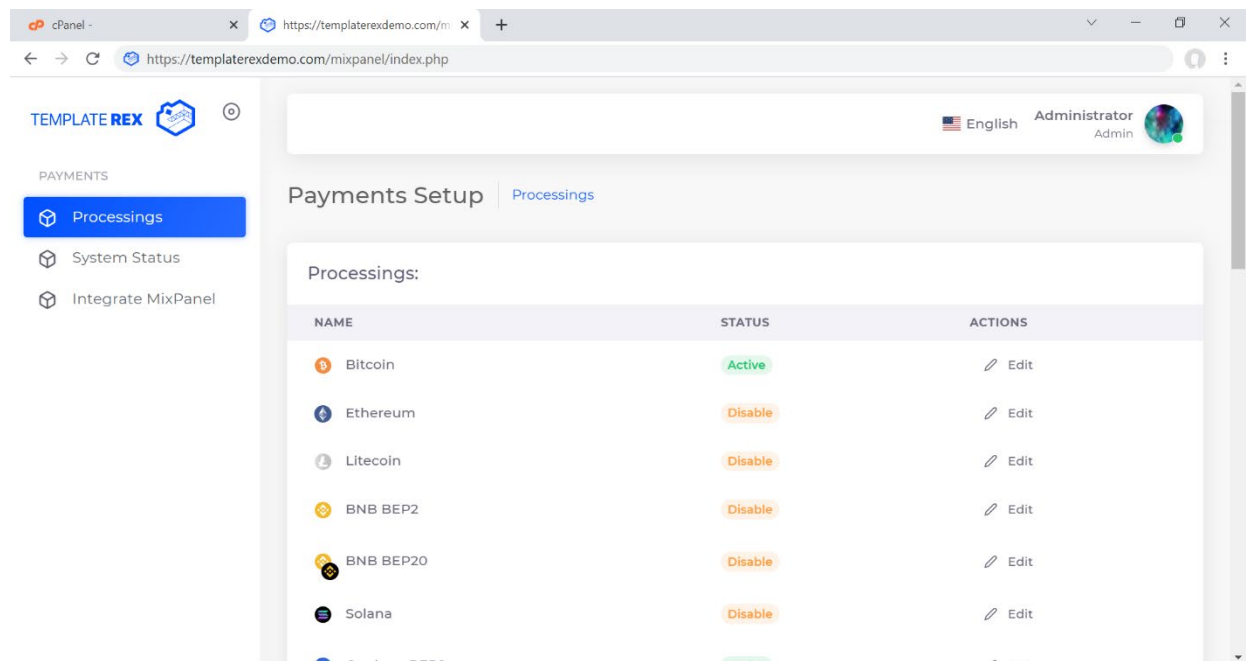

16. Use the login button to enter your MixPanel and thus configure all your payment processors.

17. In the MixPanel login screen use exactly the same login details to your script administrator previously configured, you will use this administrator for your script and for MixPanel.

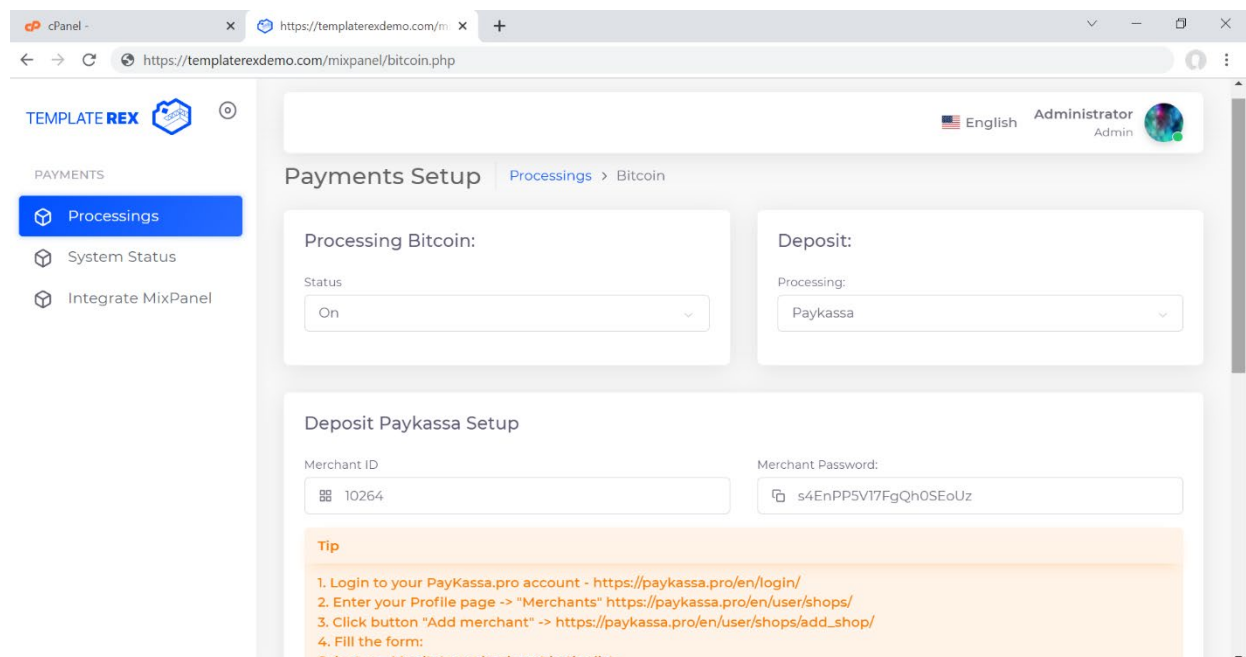

18. You will be redirected to your MixPanel admin panel, here you can configure the payment processors you want to activate in your project.

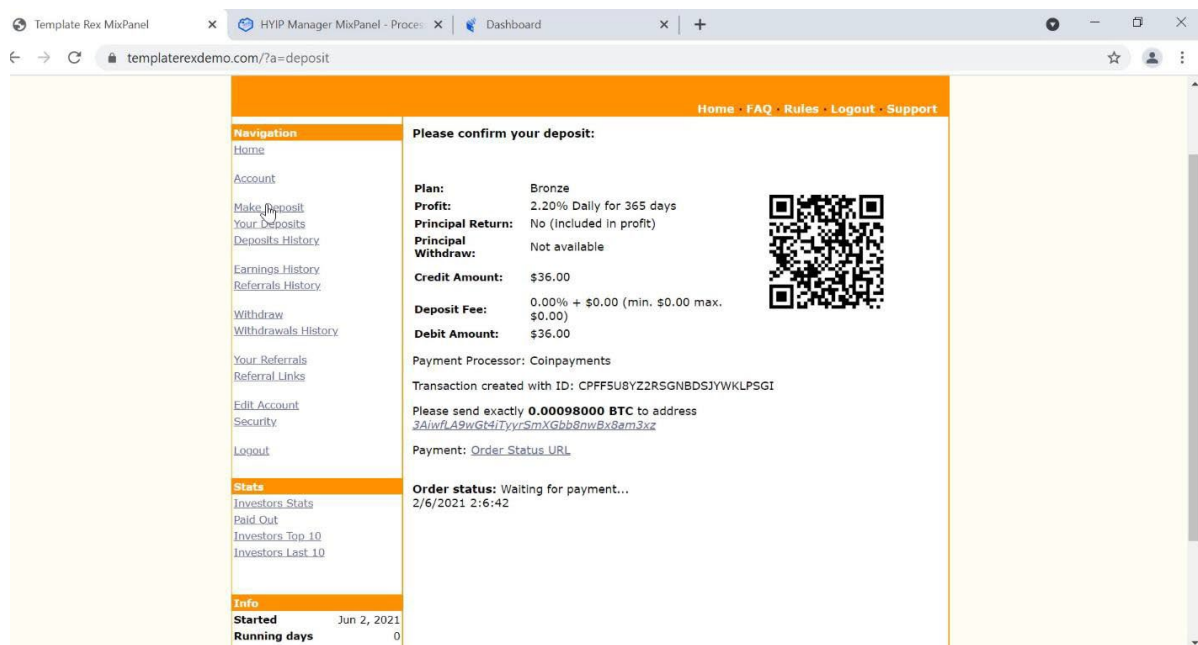

19. Enter each processor you want to activate and fill in the API data corresponding to the processor, you will find a TIP that explains step by step how to configure your API data.

Remember to verify the data of your API, a bad configuration will make the processor not work correctly.

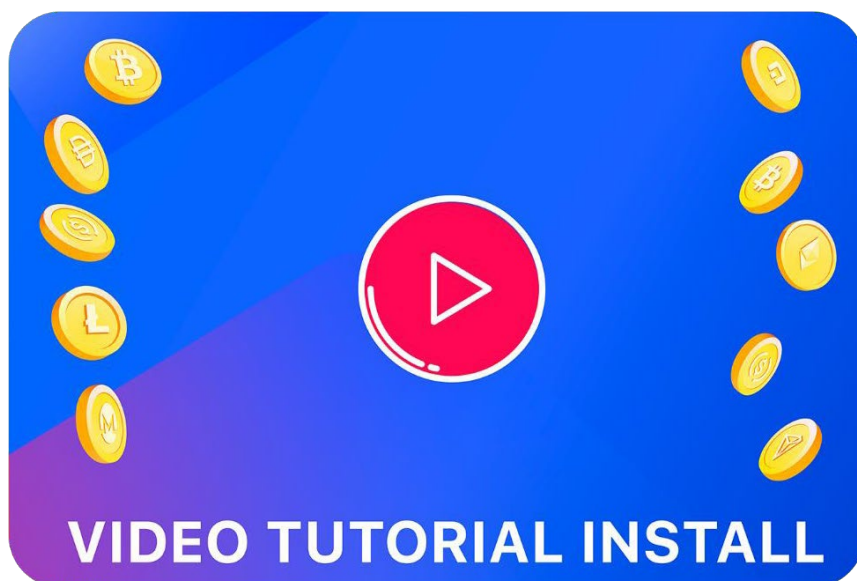

20. When you finish setting up your payment methods they will be integrated into your project.

Remember all the processors that you configure and activate in your MixPanel will be activated in your project where you can receive automatic payments and withdrawals.

Video Tutorial – Install HYIP Manager MixPanel

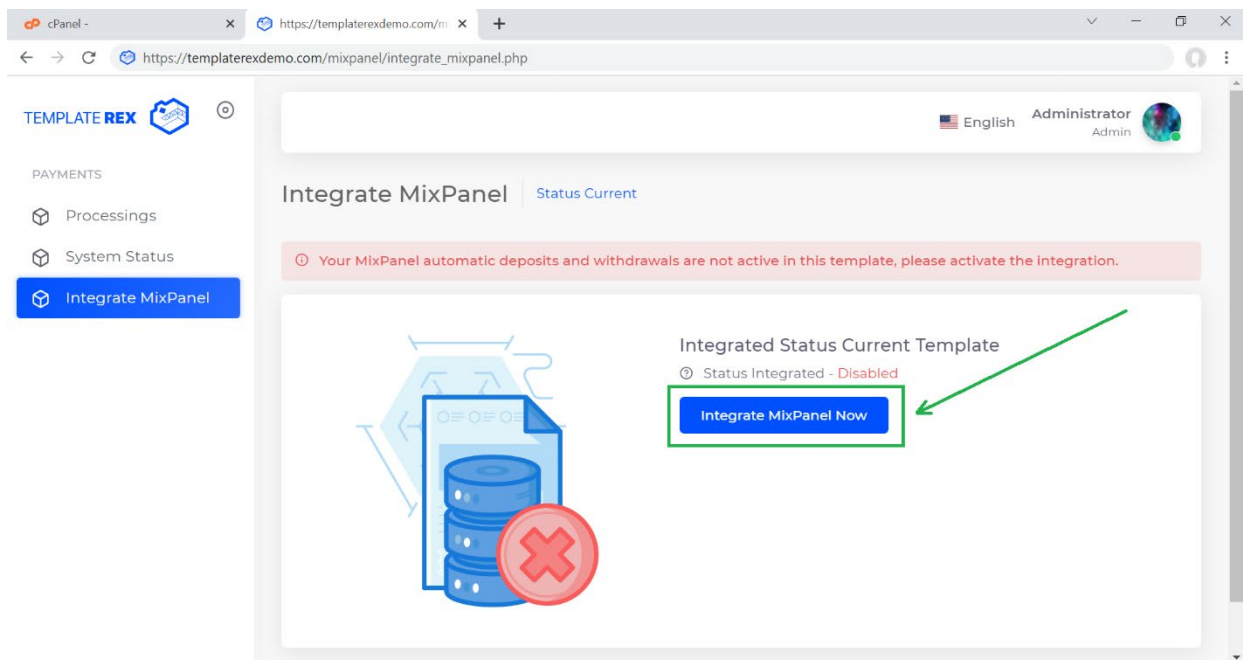

Use our Video tutorial to help guide you in the installation and activation of your HYIP Manager MixPanel, click on the image or follow the following link:

How to integrate MixPanel in any template for HYIP Manager?

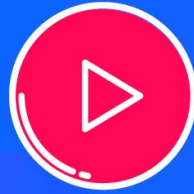

IMPORTANT: The MixPanel script is fully compatible with any template of the GoldCoders HYIP Manager Pro script, when you install a template in your project you must integrate MixPanel to your template to see the payment processors of your MixPanel.

If you have installed a template you can see the status if mixpanel is integrated into the template, you can automatically integrate MixPanel into your template, use the option Integrate MixPanel Now.

Once the process is completed correctly, you will be able to see the confirmation screen that indicates that MixPanel is integrated into your current template, which will allow you to receive your deposits and automatic withdrawals configured in MixPanel.

VIDEO TUTORIAL INTEGRATE MIXPANEL IN ANY TEMPLATE

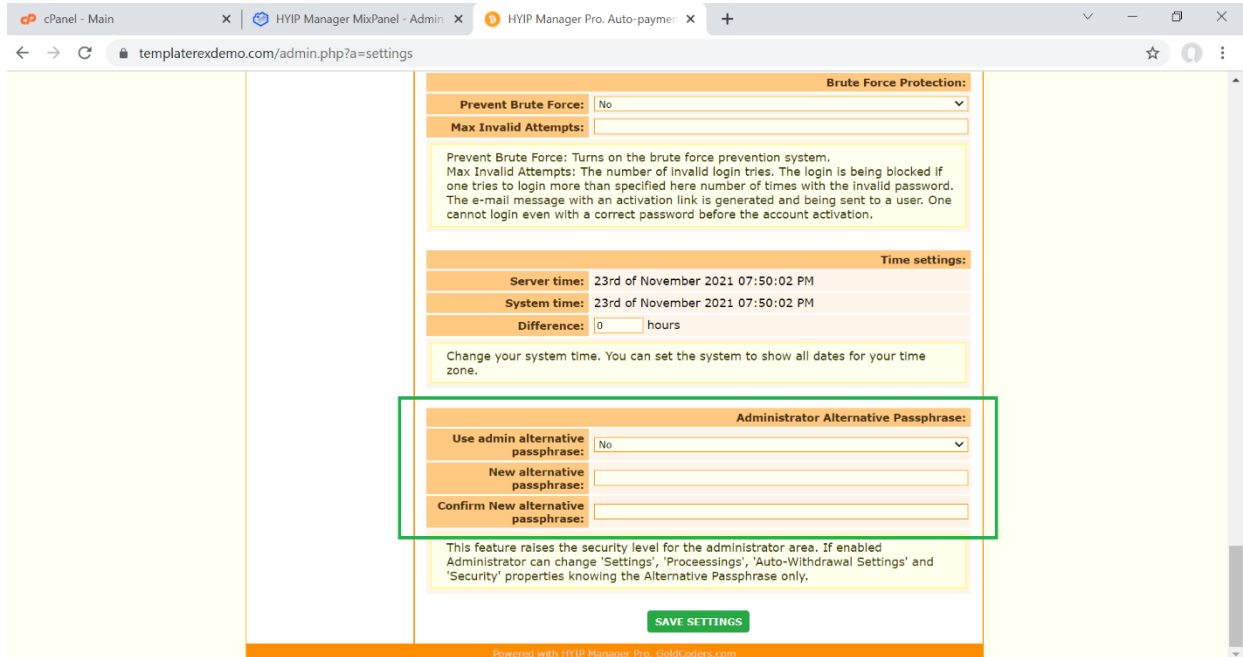

Remember that you must integrate MixPanel in your template to use all MixPanel processors so you will receive automatic payments and withdrawals in your project and if it is necessary to make a customization in your design to adjust the details, follow the steps in the following video to integrate MixPanel in any HYIP Manager template:

[View video tutorial integrate MixPanel in any HYIP Manager template](#)

Protect Your Installation For Security

IMPORTANT! It is recommended to activate the Administrator Alternative Passphrase option in your administrator for automatic withdrawals and increase the security of your project.

The screenshot shows the 'Brute Force Protection' and 'Administrator Alternative Passphrase' settings in the HYIP Manager Admin interface. The 'Administrator Alternative Passphrase' section is highlighted with a green box. It includes a dropdown menu for 'Use admin alternative passphrase' (set to 'No'), and input fields for 'New alternative passphrase' and 'Confirm New alternative passphrase'. A 'SAVE SETTINGS' button is located below the form.

Brute Force Protection:

Prevent Brute Force: No

Max Invalid Attempts:

Prevent Brute Force: Turns on the brute force prevention system. Max Invalid Attempts: The number of invalid login tries. The login is being blocked if one tries to login more than specified here number of times with the invalid password. The e-mail message with an activation link is generated and being sent to a user. One cannot login even with a correct password before the account activation.

Time settings:

Server time: 23rd of November 2021 07:50:02 PM

System time: 23rd of November 2021 07:50:02 PM

Difference: 0 hours

Change your system time. You can set the system to show all dates for your time zone.

Administrator Alternative Passphrase:

Use admin alternative passphrase: No

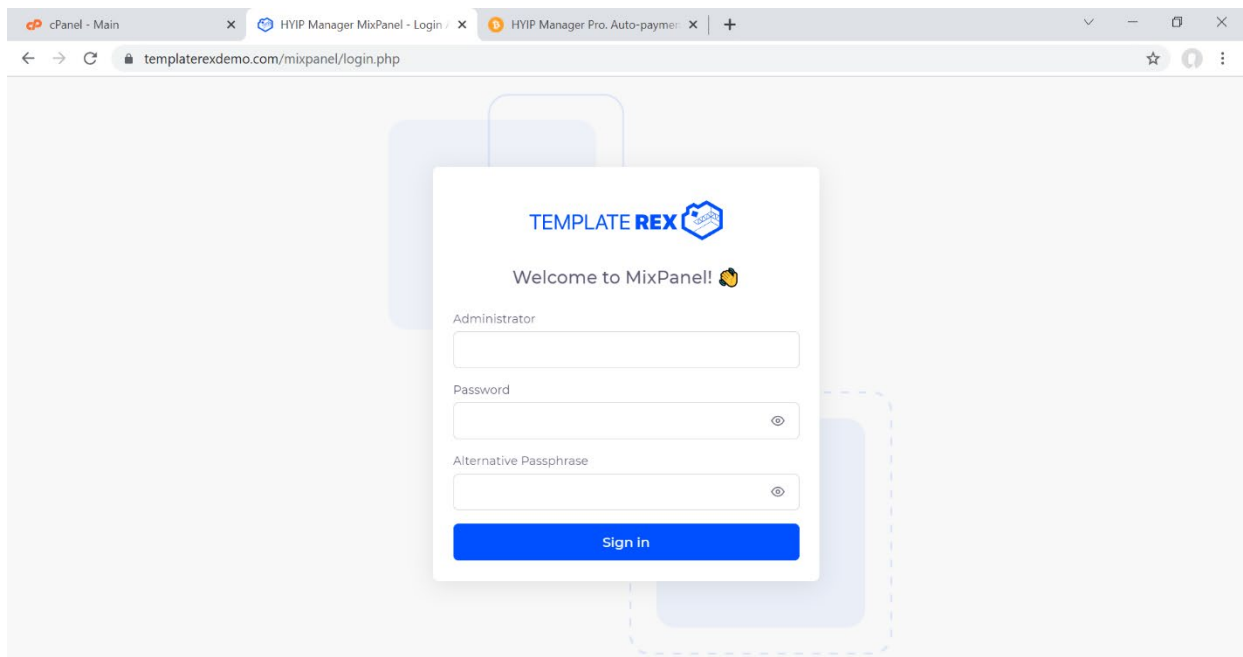

New alternative passphrase:

Confirm New alternative passphrase:

This feature raises the security level for the administrator area. If enabled Administrator can change 'Settings', 'Processings', 'Auto-Withdrawal Settings' and 'Security' properties knowing the Alternative Passphrase only.

SAVE SETTINGS

Once this option is activated, MixPanel will request your Administrator Alternative Passphrase configured in HYIP Manager and to modify the options of your administrator.

The screenshot shows the login page for MixPanel. It features a 'Sign in' button and three input fields: 'Administrator', 'Password', and 'Alternative Passphrase'. The 'Alternative Passphrase' field is highlighted with a blue dashed border.

TEMPLATE REX

Welcome to MixPanel!

Administrator

Do you have problems with the installation?

Do not worry if for some reason the script is not displaying it on your website, these are some steps that will help, we recommend that you first check the FAQ. Many questions are answered here:

www.templaterex.com/script-hyip-manager-pro-mixpanel/#faq

STEP 1. You verify that the content of the template has been unzipped at your root site and is not a folder:

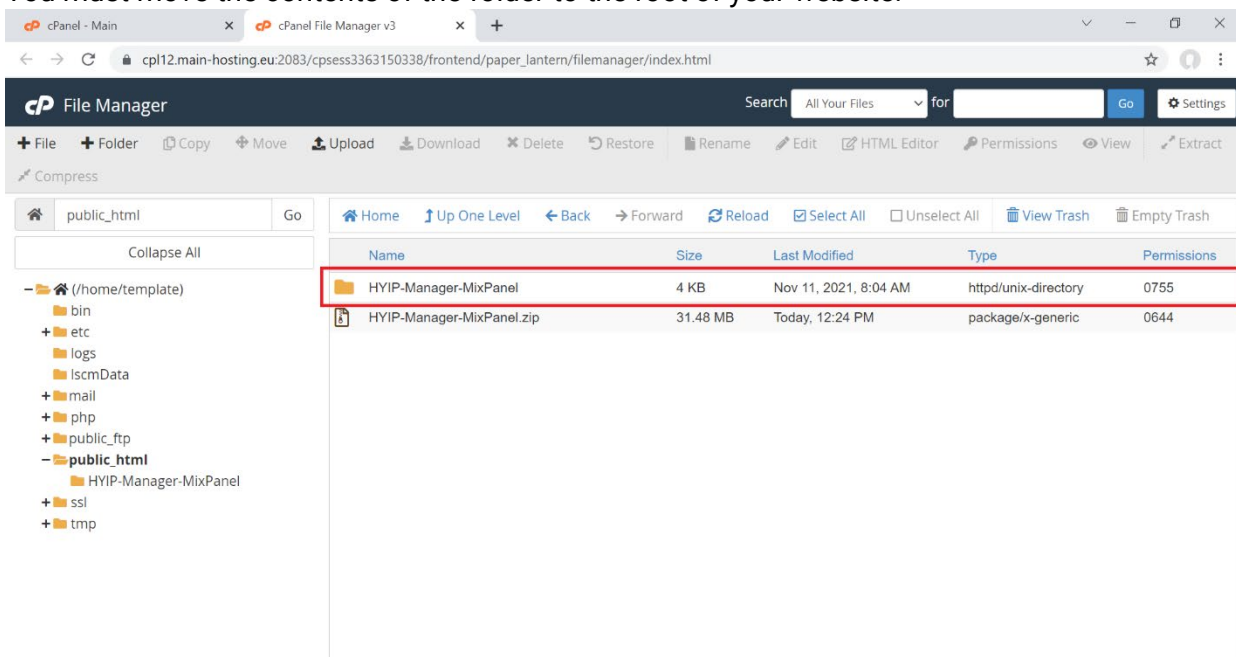

The screenshot shows the cPanel File Manager interface. The left sidebar displays a directory tree with the following structure:

- public_html
 - bin
 - etc
 - logs
 - IscomData
 - mail
 - php
 - public_html
 - HYIP-Manager-MixPanel
 - ssl
 - tmp

The main content area shows a table of files and folders:

Name	Size	Last Modified	Type	Permissions
HYIP-Manager-MixPanel	4 KB	Today, 9:35 PM	httpd/unix-directory	0755
HYIP-Manager-MixPanel.zip	28.93 MB	Today, 1:27 PM	package/x-generic	0644

You must move the contents of the folder to the root of your website:

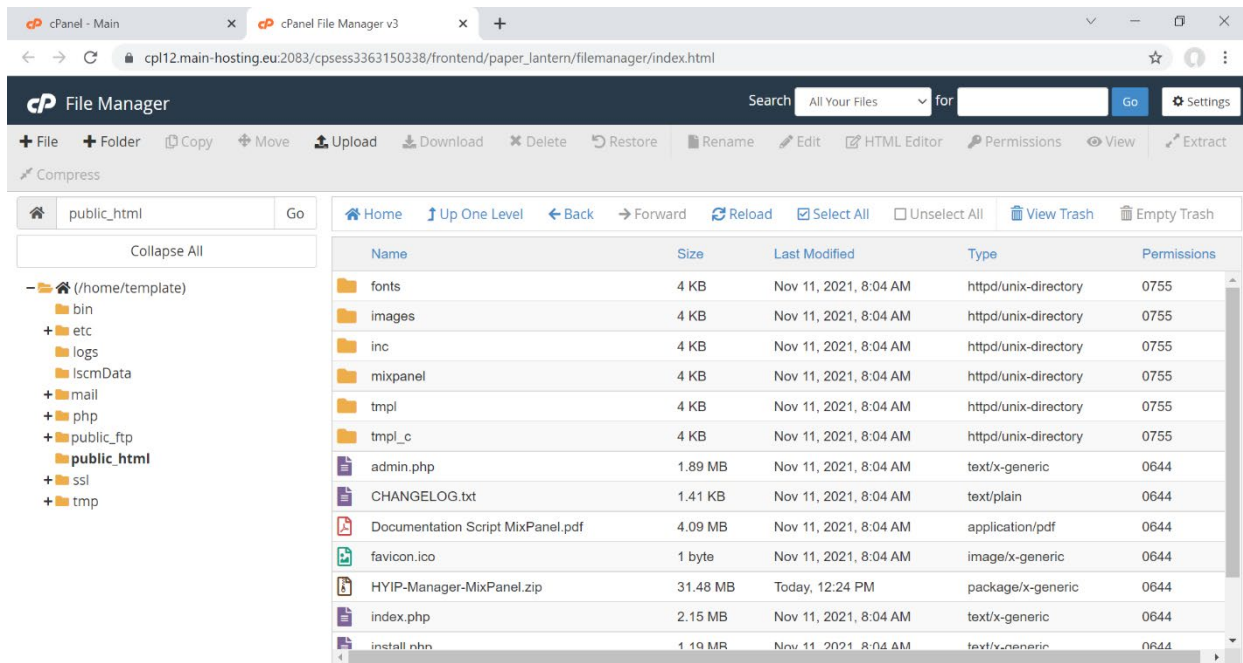

The screenshot shows the cPanel File Manager interface after the folder has been moved. The left sidebar directory tree is now:

- public_html
 - bin
 - etc
 - logs
 - IscomData
 - mail
 - php
 - public_html
 - HYIP-Manager-MixPanel
 - ssl
 - tmp

The main content area table is updated:

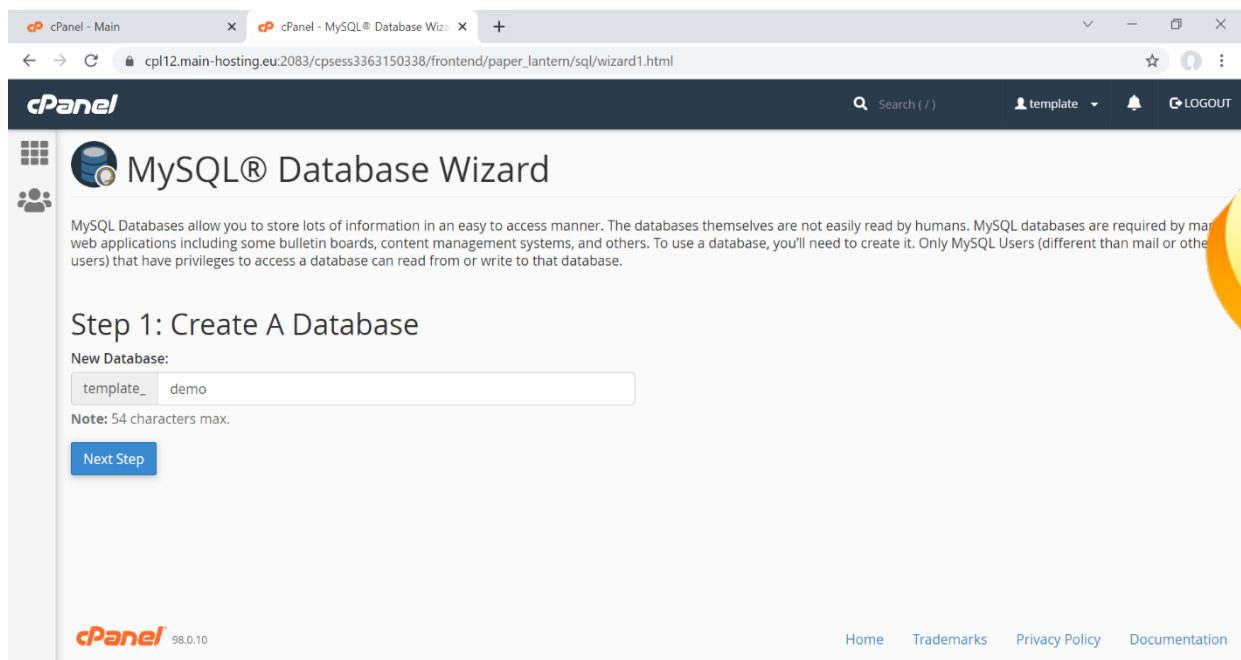

Name	Size	Last Modified	Type	Permissions
HYIP-Manager-MixPanel	4 KB	Nov 11, 2021, 8:04 AM	httpd/unix-directory	0755
HYIP-Manager-MixPanel.zip	31.48 MB	Today, 12:24 PM	package/x-generic	0644

You must move the contents of the folder to the root of your website:

The screenshot shows the cPanel File Manager interface. The left sidebar displays a tree view of the file system, with the 'public_html' folder selected. The main content area shows a list of files and folders with columns for Name, Size, Last Modified, Type, and Permissions. The files listed include folders like 'fonts', 'images', 'inc', 'mixpanel', 'tmpl', and 'tmp', as well as files like 'admin.php', 'CHANGELOG.txt', 'Documentation Script MixPanel.pdf', 'favicon.ico', 'HYIP-Manager-MixPanel.zip', 'index.php', and 'install.php'.

STEP 2. Review the connection data to your database which should have been previously created, if the data in your database is not correct, the script will not continue the installation process.

The screenshot shows the cPanel MySQL Database Wizard interface. The page title is 'MySQL Database Wizard'. The main heading is 'Step 1: Create A Database'. Below this, there is a form for creating a new database with the name 'template_demo' entered. A 'Next Step' button is visible below the form.

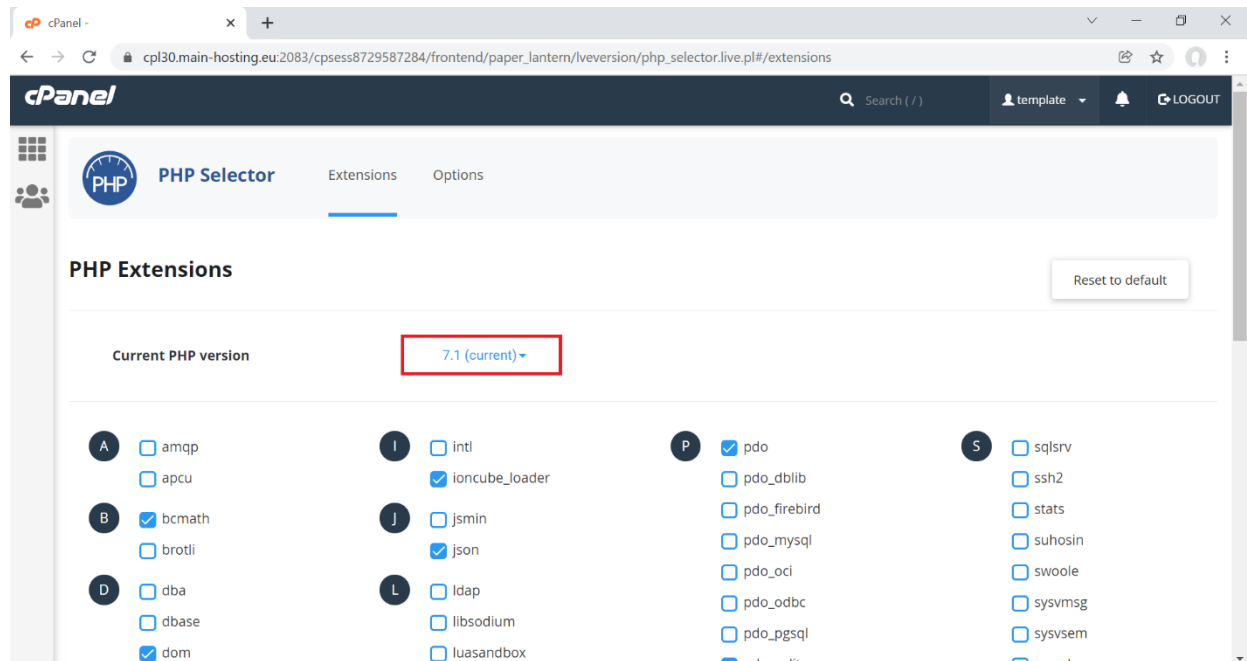

The screenshot shows the cPanel MySQL Database Wizard interface. At the top, a green message box states: "You have created a MariaDB/MySQL database named 'template_demo'." Below this, the heading "Step 2: Create Database Users:" is displayed. The form includes a "Username:" field with the value "template_demo_user", a "Password:" field, and a "Password (Again):" field. A "Strength" indicator shows "Very Strong (100/100)" with a green bar. A "Password Generator" button is visible to the right. At the bottom left, there is a blue "Create User" button.

Note: It is very important that you have granted all the privileges to your database.

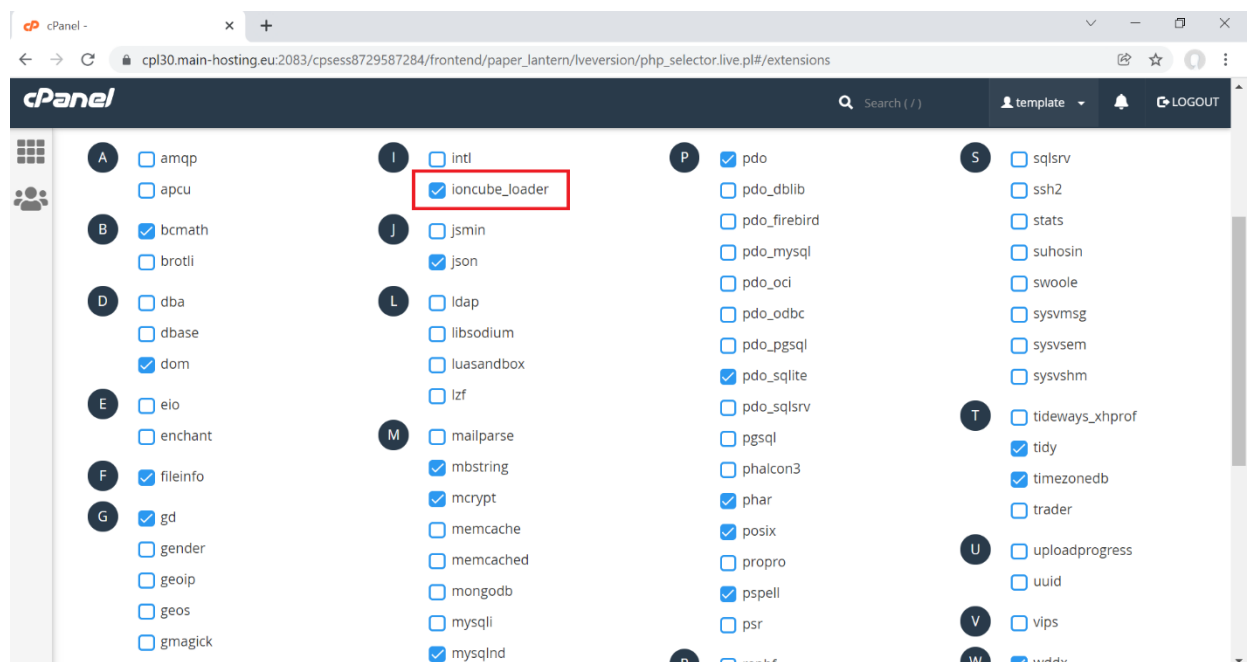

The screenshot shows the cPanel MySQL Database Wizard interface for Step 3: "Add user to the database." A green message box at the top says: "You have successfully created a MySQL user named 'template_demo_user'." Below the heading, the user and database names are listed: "User: template_demo_user" and "Database: template_demo". A list of privileges is shown, with "ALL PRIVILEGES" selected and highlighted by a green box. Other visible privileges include ALTER, CREATE, CREATE TEMPORARY TABLES, DELETE, EVENT, ALTER ROUTINE, CREATE ROUTINE, CREATE VIEW, DROP, and EXFLUTE.

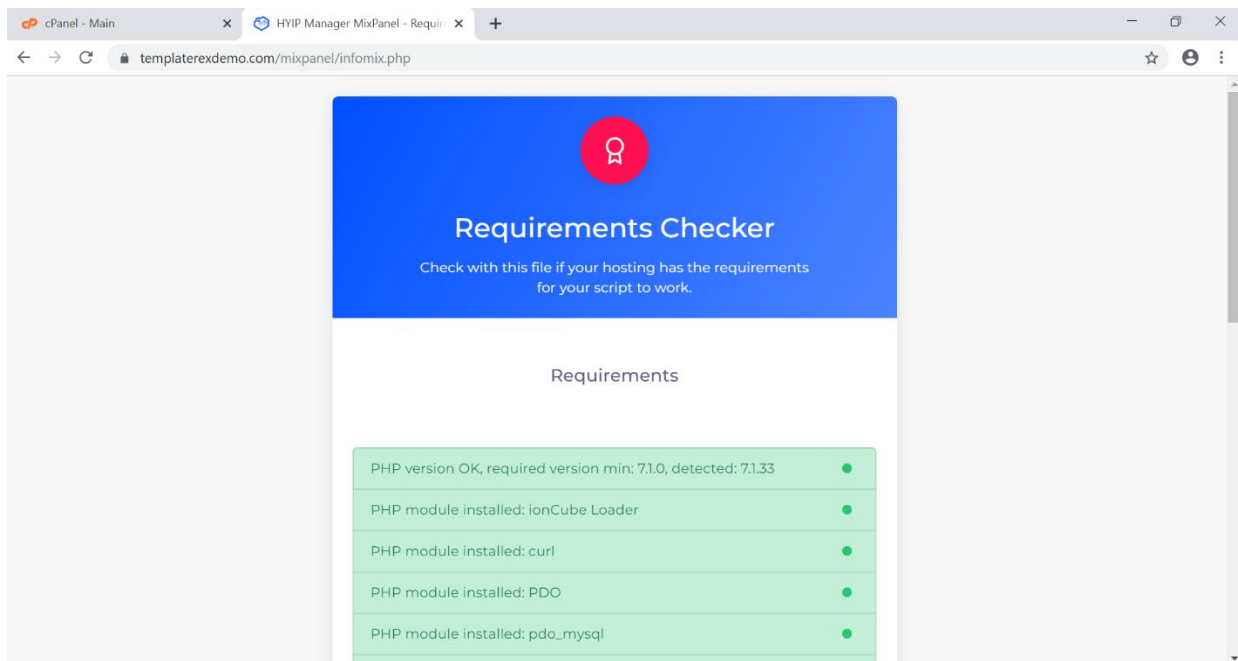

STEP 3. Remember to verify that your PHP version is in 7.x & extension ioncube_loader for your domain where the script is and it will be installed

STEP 4. Verify that the requirements that the script needs in the extensions of the PHP 7.x version need to have activated the activated Ioncube.

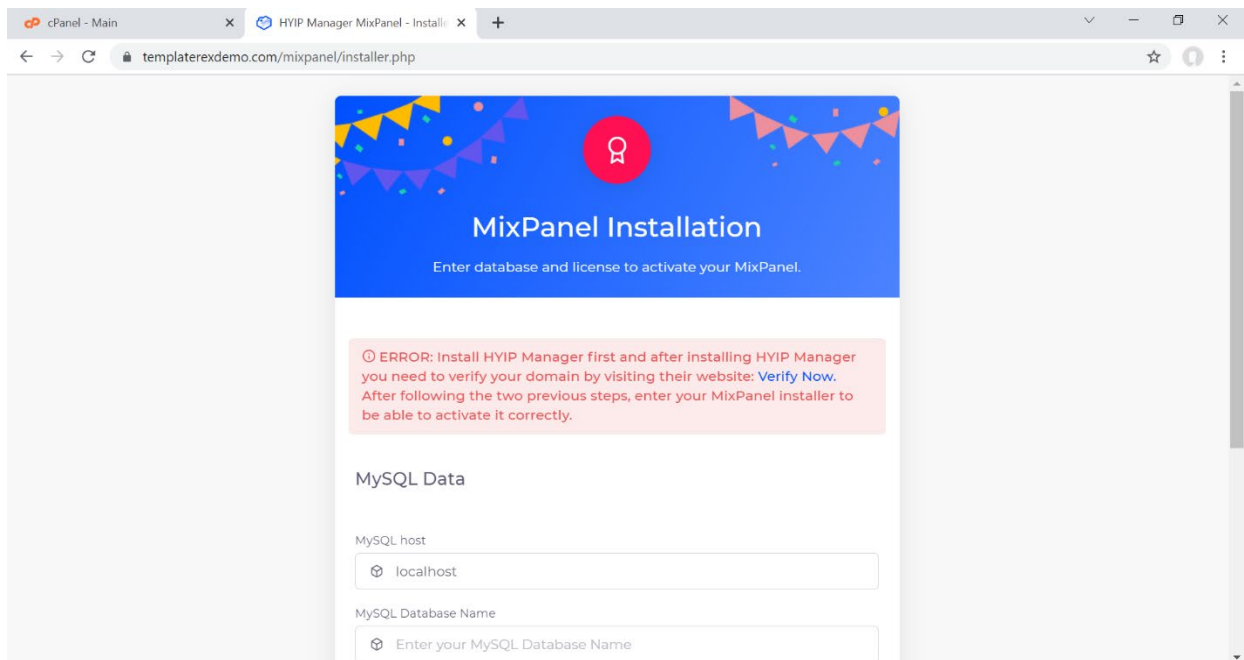

STEP 5. We recommend that you use our requirements verification system, go to: www.yourdomain.com/mixpanel/infomix.php, you can see if your hosting meets all the requirements, as shown below.

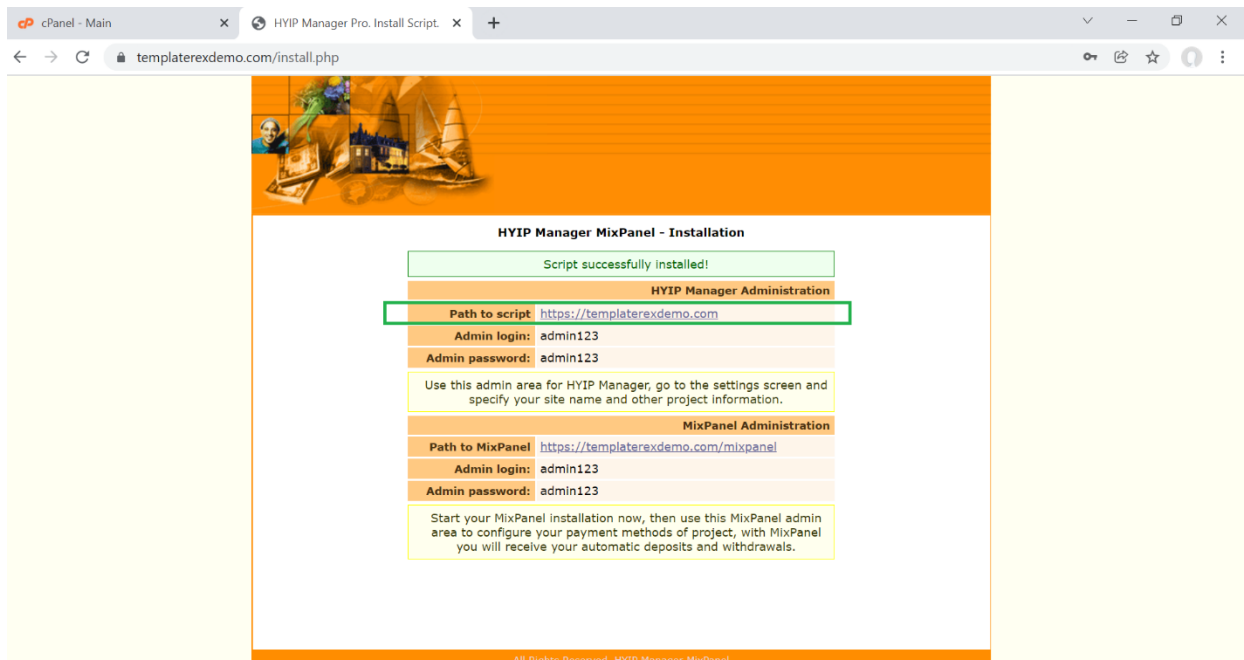

STEP 6. If you continue to have problems starting the installation by having a blank screen, a cache problem may have been generated, after performing the above steps, first try to purge your browser cache With CTRL + F5 this should purge the cache, as a second option delete all the files and reload the .zip script and unzip it again at the root of this file you should not have any more problems to continue its installation.

File Upload

STEP 7. If you are getting this error when trying to activate your MixPanel, you must first follow 2 steps, verify that you have done them before correctly activating your MixPanel.

It is necessary that you first install your HYIP Manger script and as a second step you have to visit the URL of your website, you can open it in a tab, and then you can continue with the activation of your MixPanel.

30 days deposit. 150%

Plan	Spent Amount (\$)	Profit (%)
Plan 1	\$10.00 - \$100.00	10.00
Plan 2	\$101.00 - \$1000.00	20.00
Plan 3	\$1001.00 and more	50.00

After visiting your website, you will only have to re-enter the same data in your Database and the license key of your MixPanel.

templaterexdemo.com/mixpanel/installer.php

MySQL Data

MySQL host

MySQL Database Name

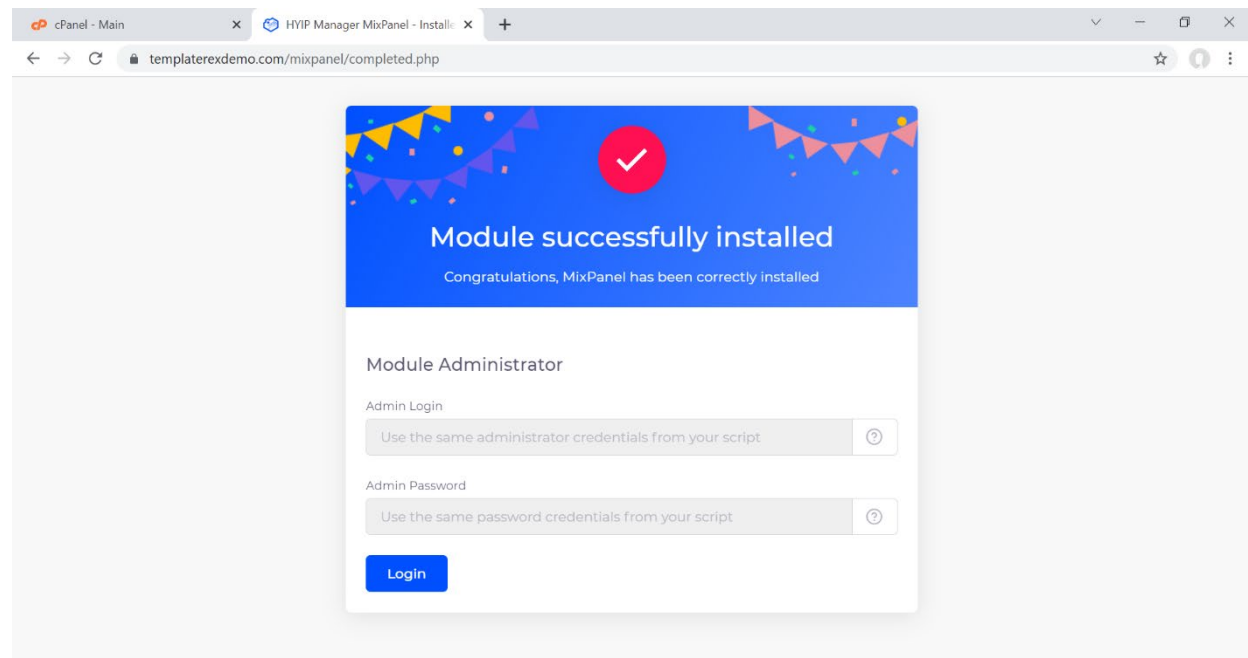

MySQL Database Username

MySQL Database Password

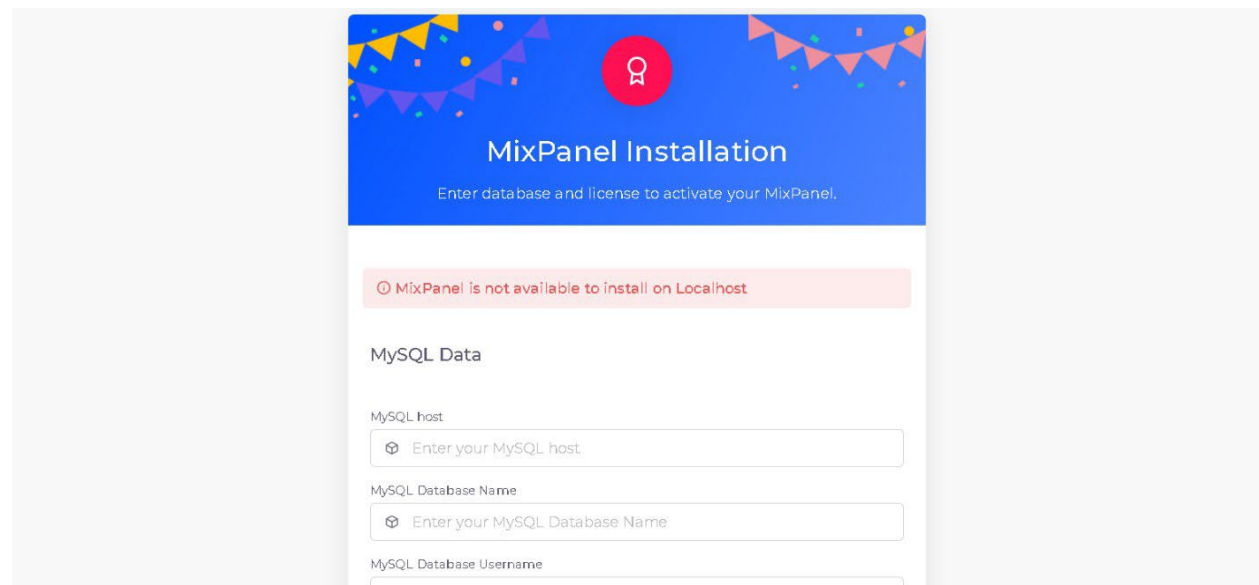

Enter License Key

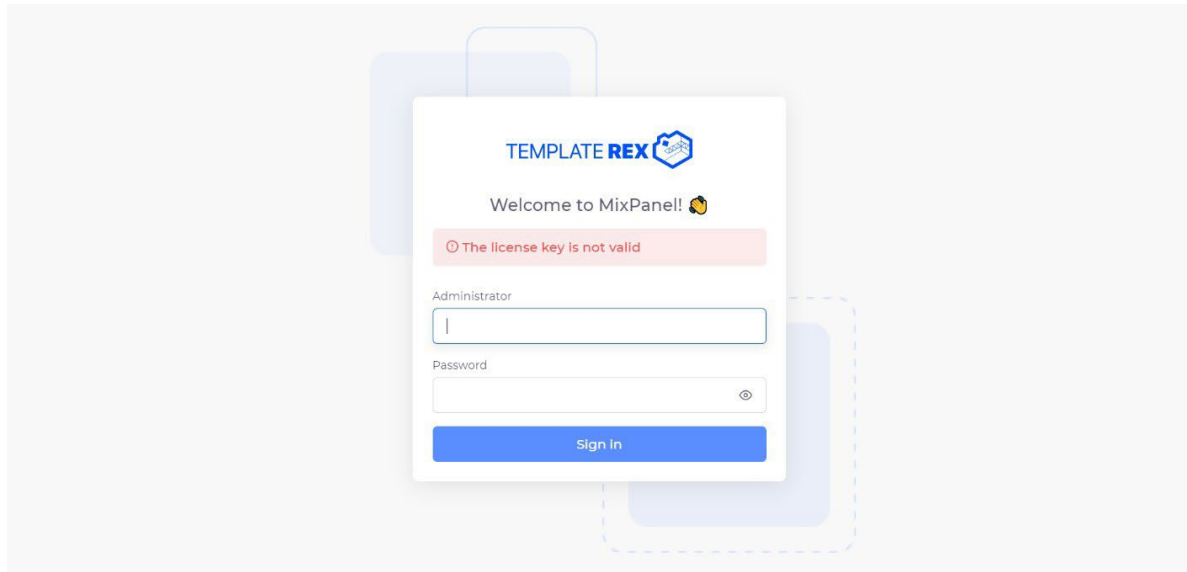

Once you enter all the data correctly in your MixPanel you will get the confirmation screen of the complete installation!

STEP 8. MixPanel is not available to install on Localhost, it is only available to activate on live sites, if you try to install it on localhost, you will get an error, you can install your script in localhost mode to test global functions and others but you will not be able to activate your MixPanel on localhost.

STEP 9. If when trying to log into MixPanel you are getting the message: The license key is not valid, verify that you have installed your license correctly on your server.

A. Check the permissions of the files on your server:

Name	Size	Last Modified	Type	Permissions
fonts	4 KB	Jun 1, 2021, 6:41 AM	httpd/unix-directory	0755
images	4 KB	Jun 1, 2021, 6:41 AM	httpd/unix-directory	0755

tmpl	4 KB	Jun 4, 2021, 3:22 PM	httpd/unix-directory	0755
tmpl_c	12 KB	Today, 3:27 PM	httpd/unix-directory	0755
admin.php	1.84 MB	Jun 1, 2021, 6:41 AM	application/x-httpd-php	0644
favicon.ico	1.12 KB	Jun 4, 2021, 3:13 PM	image/x-generic	0644
index.php	2.1 MB	Jun 1, 2021, 6:41 AM	application/x-httpd-php	0644
payeer_1418524498.txt	10 bytes	Jun 2, 2021, 7:15 PM	text/plain	0644
settings.php	16.48 KB	Yesterday, 7:42 AM	application/x-httpd-php	0644
style.css	2.42 KB	Jun 1, 2021, 6:41 AM	text/css	0644

B. Try re-download and reinstall your MixPanel once you verify the previous steps you can follow the following Video Tutorial:

<https://www.templaterex.com/my-account/>

[Video Tutorial How Install MixPanel](#)

STEP 10. If after installing everything and following the previous steps you get the error 503 - Service Unavailable when trying to enter your MixPanel, contact our Template Rex team this error is related to your Hosting, send us a ticket and we will help you solve it.

503

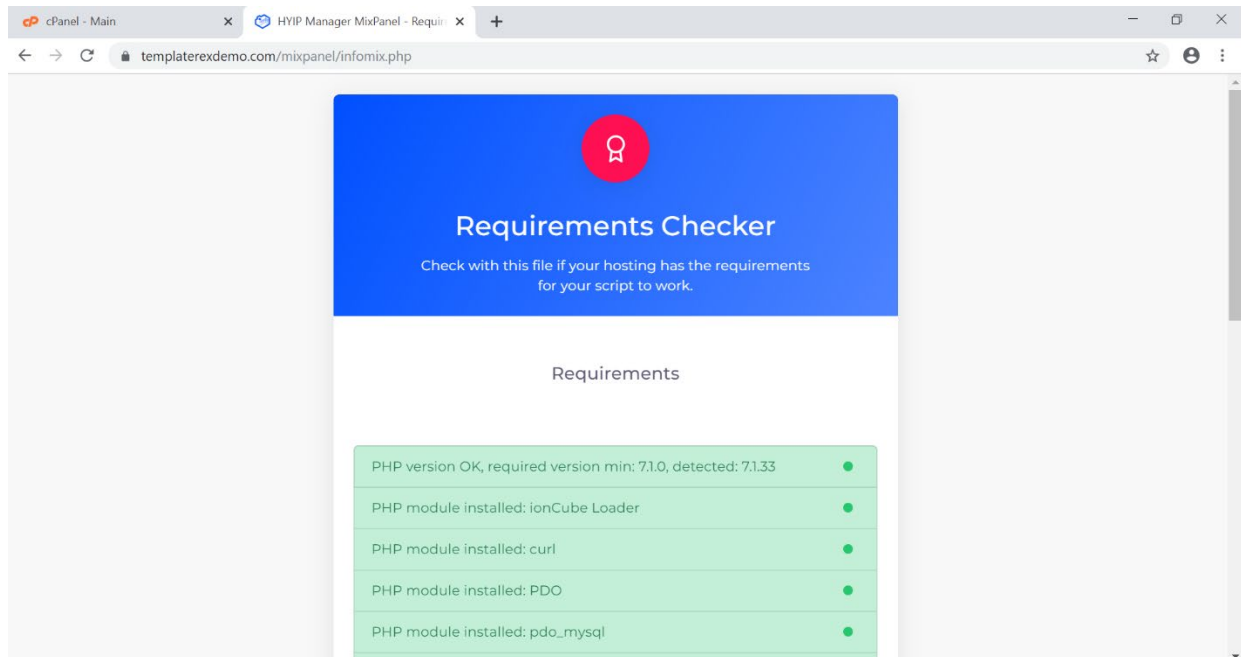

Service Unavailable

The server is temporarily busy, try again later!

It is recommended

We recommend that you use our requirements verification system, go to: www.yourdomain.com/mixpanel/infomix.php, you can see if your hosting meets all the requirements, as shown below.

1. Protect your installation with services such as SSL certificate, Firewall, DDOS, CDN to increase security in your project and avoid attackers.
2. Generate strong passwords for your project if you have shared a password remember to change it, keep them in a safe place, you can use the following site to generate strong passwords or use your preferred service.

www.passwordsgenerator.net

3. **Remember that your purchase has 1 month of support, our support does not extend to customizations of our customers.**
